Please do not allow the NAB to stop XM Radio from broadcasting Instant Traffic & weather. My husband is a truck driver who drives cross country between LA & New York City. He uses this service to help him plan routes to take in major cities. He can follow the weather & get information about traffic problems so that he can plan alternate routes to prevent him from being delayed. With satellite radio, he can listen to many varieties of channels without having to worry about losing the signal as he drives down the highway. He can listen to news anytime he chooses & he doesn't have to worry about finding a station only to lose that station's signal a few miles down the road.

He has a right to have these services available to him. They aid him in doing his job & perhaps he's a better truck driver because of it. I know I don't have to worry about him trying to find radio stations and not paying attention to the road and causing/having a wreck.

Please, please reject the NAB's petition 04-160. A truck driver's life may well depend on it.
